

# **ESCORTS RT 40**

Rough Terrain Hydraulic Mobile Crane

## **Technical Data**

#### Super Structure Frame

- Super Structure: All welded rigid construction.
- Counter Weight: Removable & bolted to superstructure.

- 4 part telescopic boom.
- 4 part fully powered sequence synchronized rectangular boom.
- Overall length: Retracted 10.5 m; Extended- 33.6 m.

#### **Boom Lifting**

- Double acting single cylinder with lowering brake valve.
- Angle of elevation -2 deg. to +80 deg.

 Hydraulic winch with axial piston motor, grooved drum & planetary reduction gear box with spring loaded cable roller for better rope spooling.

- 360 degree rotation controlled by hydraulic motor.
- · Freewheeling safety device for automatic alignment of boom over the load.

#### **Hook Block**

- 40 MT swivel type hook block with 4 sheaves reeved for 8 part line with safety latch.
- Wire rope diameter of 18 / 19 mm.

### **Operator Cabin**

• Fully enclosed cabin of steel construction, sliding door & emergency exit door with large-sized safety glass windows, adjustable driver seat.

#### Crane Controls

- Auto reversal mechanism to ensure correct steering wheel control irrespective of the position of the superstructure in relation to the chassis.
- All controls for crane travelling and crane functions are with in easy reach, Armrest mounted joystick and automotive type steering wheel.
- Operator cabin is equipped with wiper, horn, cabin fan & cab light, crane leveling gauge, free slew pedal, brake pedal, throttle pedal, dynamic brake pedal for slew, electric switch for outrigger operation, transmission gear selector, mechanical slew lock lever, air/hydraulic/pilot pressure gauge, rear steer centering indicator, hydraulic filter clogging indicator, low hydraulic oil level warning, axle lockout switch, SLI with audio-visual indicators etc.

### **Safety Devices**

- Safety devices such as relief valves, balance valves & brake valves fitted in hydraulic system to prevent the accidents.
- Limit switch on boom head for over hoisting snatch block and on winch for over lowering with hydraulic cut off & warning.

#### Load Limiting Device

- Indicates boom elevation, boom length, actual load, rated load, load radius, number of falls & boom height.
- In overload condition there is audio visual warning & all such hydraulic operation that tend to increase load moment (unsafe operations) are automatically cut-off while operation like derricking in & hoisting down still being possible.

Torsion & bending resistant with rigid steel structure box type frame made with high strength alloy steel.

### Outriggers

Four nos. out and down type, hydraulically operated with fail-safe dual lock valves.

### **Engine**

- Suitable water cooled, turbo-charged diesel engine of adequate HP.
- Fuel tank 270 Liters.

 Power shift with build in torque converter with adequate speeds controlled from cab.

#### **Brakes**

- Service: Foot operated, hydraulically applied pneumatically assisted split circuit disc brake on all wheels.
- Parking: Hand operated lever / switch, spring applied hydraulically released front axle mounted disc brake.

### **Steering**

- Fully hydraulic & independent power steering operated from cab.
- Four steering modes: 2-wheel (Front), 2-wheel (Rear), 4 wheel coordinated & crab.

#### Axle

- Front Axle: Drive & steer with differential & planetary reduction hubs, rigid frame mounted.
- Rear Axle : Drive & steer with differential & planetary reduction hubs, centrally pivoted, lateral oscillating with hydraulic locking device.

- 4 x 4 for off-road movement & all wheel drive.
- 4 x 2 for road travel, front axle drive.

• Tyres: 18 x 25 32 PR, 4 nos. Earthmover type.

#### **Electricals**

- 2 x 12 volts system
- 2 main head lamps, 2 brake and flashing trafficator lamps at rear, 2 flashing trafficator lamps at front, 1 work lamp.

### **Gradeability**

• 50% (Unladen)

#### **Hydraulic Pumps**

• One single pump & one double pump mounted on transmission PTO.

#### **Hydraulic System**

- Multi section 3 position proportional & flow sharing directional control valve operated by joystick for slew, telescoping, hoisting and derricking with independent or simultaneous crane operations & progressive speed
- Safety valves in all hydraulic cylinders for protection against pipe and hose ruptures.
- Oil cooler for cooling of hydraulic and transmission oil.

### **Optional Extra**

- Lattice boom extension 8.5 m
- Emergency wind off system
- Fire detection and suppression system High tension warning device
- Cold starting kit
- 6 tonne hook block Telematics system
- Spare wheel & tyre
- Air conditioner
- - Towing hook
  - Fog light

To meet manufacturing conditions and developments in design, the illustrations and information in this publication are subject to modification without notice.

## **Load Chart**

	LIFTING CAPACITIES ON FULLY EXTENDED OUTRIGGER (100 %) WITH SLEWING RANGE 360°
